## **Modernized e-File Available Soon for Ohio Municipal Net Profit Tax Filing**

The Ohio Department of Taxation (ODT), in cooperation with the IRS and tax preparation software vendors, will be offering Modernized e-File (MeF) for taxpayers and tax practitioners who have opted to file the 2018 municipal net profit tax return with ODT.

To date, two prominent software vendors have submitted written notice that they intend to include an MeF option for the municipal net profit tax in their 2018 tax preparation software packages. Thomson Reuters will incorporate the municipal tax option in their UltraTax CS product; CCH Incorporated will do so in their CCH ProSystem fx package.

ODT is inviting and encouraging other tax preparation software vendors to consider incorporating MeF for the State-administered municipal net profit tax into their commercial/professional products as well.

The Department has all the information needed for development of MeF software available on its [website](#). Testing of products intended for use in the 2018 tax year filing season will begin this fall.

For more information or assistance, please call ODT's Business Tax Division at (844) 238-0403 or by email at [MNPTax@tax.state.oh.us](mailto:MNPTax@tax.state.oh.us).
